

REMARKS

Entry of the above amendments is respectfully requested pursuant to 37 CFR 1.312.

During a telephone interview on April 16, 2007 between the undersigned and Examiner Wong, agreement was reached regarding a non-narrowing amendment of the last two lines of claim 25 to changing "said regenerator uses a signal whose amplitude is zero as the signal for suppressing peak power" to "said signal for suppressing peak power comprises a signal whose amplitude is quasi-zero." Agreement was reached to amend claims 30-32 in a similar manner. It was agreed that these amendments would be made via an Examiner's Amendment accompanying a notice of allowance.

However, the Examiner's Amendment contained several errors, as noted by the undersigned during another telephone interview on May 16, 2007, between the undersigned and examiner Wong.

The corrected (agreed-upon) claim amendments are set forth above.

In view of the foregoing, entry of these amendments is requested as warranted under the provisions of 37 CFR 1.312.

If any issues remain which may best be resolved through a telephone communication, the Examiner is requested to telephone

the undersigned at the local Washington, D.C. telephone number listed below.

Respectfully submitted,

A handwritten signature in black ink, appearing to read "James E. Ledbetter", written over a horizontal line.
